

# FIST NETWORK TOKEN

White paper

## DISCLAIMER

This document is a technical white paper that presents the current and future plans for FIST NETWORK. The sole purpose of this document is to provide Information and not a precise description on future plans. Nothing in this whitepaper is an offer to mine the tokens or the solicitation of an offer not to mine, or an offer to buy or not at launch. FIST NETWORK is publishing this whitepaper solely to receive feedback from the public. The products organized in this document are still under development and are yet to be incorporated.

Nothing in this document should be treated or read as a guarantee or promise of how **FIST NETWORK TOKEN** will develop or of the utility or value of the token. This document outlines current

plans, which could change at discretion, and the success of this project will depend on many factors outside FIST NETWORK control.

# INTRODUCTION

As a team, we have been through the good, bad and ugly in the crypto space and also outside the crypto space.

The lost trust, lack of reciprocation of trust, and simply not being able to feel comfortable in what you are investing in. The team have come together to create not only a trustworthy token but one that will revolutionize and positively impact the world in an amazing way. The world as a business place lacks moral and teams that truly wants to do the right team.

To understand where the thought and idea of creating this token came from, we have to rewind to an experience I had some time back. I was in need of an App developer and I was referred to someone I've not seen or know before, we both agreed to strike a deal for a business unfortunately I got scammed after sending funds to his crypto wallet. This unfortunate catalyst was the genesis to start this project.

I wanted to do something amazing to help people overcome the situation of scammers in the business space. The team will be implementing a smart contract that'll help people transact business deals in the future and ensuring both parties reach their full satisfaction after striking a business deal. The team believes crypto is the best use case to tackle this problem through an amazing community and supporting a token that was

**100%** created for the right reasons.

# Fist network tokenomics

:

our whitepaper.

## MISSION

The mission of this project is very straightforward. Our goal is to help put an end to fraudulent activities when it comes to business activities or transactions in the real world. The main goal is to help make the business world a better place with the ideas we'll be implementing in our token to help confirm if business deals are carried out properly.

We are not to teach you how to invest or carry out your business activities, we are simply asking you to join us on an amazing journey that is going to make the world a better place. We believe FIST NETWORK TOKEN (FSNT) can create a revolutionary movement that will surpass the moon.
